

PRODUCT DATASHEET

Prosan®

PRODUCT DESCRIPTION

Prosan descales, cleans surfaces, removes soap scum and scale residue from baths, showers, toilets and urinals. It also eliminates unpleasant odours and prevents blockages in drains and pipes. Removes rust marks from floors. Prosan is biologically degradable, safe for users, equipment and the environment.

PRODUCT INSTRUCTIONS

General Dilution = From 10% - 25%

Spray Bottle:

Dilute the product 10% with 90% lukewarm water. Spray on the materials that need to be cleaned, leave exposed for a while and remove the dirt with a sponge or a moist microfibre cloth. Rinse thoroughly. For high-gloss surfaces: dry well with a microfibre cloth.

Bucket:

Dilute the product 10% with 90% lukewarm water and wash all materials with a sponge or microfibre cloth.

For heavy scale and rust marks: use the concentrated product. Rinse the surface afterwards.

Test the Prosan on a small hidden area before full application to determine it's compatibility with the surface.

IMPORTANT REMARKS

1. Store the products indoor between 10°C and 45°C; shielded from direct sunlight.
2. Diluted product is to be used within 5 days, any leftovers need to be discarded via the drain.
3. The packaging is not reusable and after emptying and rinsing, it should be removed as per your company's plastic recycling policy.

DANGERS

Detailed safety information can be found on the MSDS file.
Emergency phone number: **+27837026502**.

Prosan has no specific dangers.
